#### User Stories:

1. A user wants to be more productive so they want to start keeping a todo list. They want features that allow them to see their completed tasks, their deleted tasks, and tasks that they still need to complete.
2. A user wants to make a shopping list. They also want to be able to check items off or delete them if they change their mind.
3. A user is travelling and wants to make a list of things to pack.
